

Enjoy Better Coffee
Grind Fresh

Core All Grind

If you are serious about great coffee a consistent grinder is a must and this electric grinder packs a serious punch often associated with grinders at a much higher price.

At the touch of a button, stale, pre-ground coffee will be a thing of the past and you can give your coffee what it deserves and enjoy better coffee at home. The Core All Grind electric espresso and filter coffee grinder is a slim line countertop electric grinder for those who want to raise their coffee game and grind fresh. The hardwearing stainless-steel burr grinder has 40 settings from coarse to fine grind with excellent grind size consistency so you can appreciate fresh coffee your way.

A Grind For all Coffee Makers

You can grind from fine to coarse for espresso, stovetop, filter (Twist Press or Aeropress), pour over, cafetiere (coffee press / One Brew / Brew It Stick) and cold brew. Grind from 250 microns to over 1000 microns with the greatest consistency between 400 and 800 microns.

Simple and Easy to Clean

Unlike other grinders the burrs are simple to access, clean and replace and even comes with a brush cleverly stored in the hopper. There is no need for tools and complex instructions, with the press of a button the burrs can be removed and replaced in a couple of seconds.

Consistently Excellent Coffee

The 29mm stainless steel burrs provide excellent grind size consistency ensuring even extraction when brewing. They are powered by a powerful DC motor that has a grind speed of 415 rpm reducing the harmful impact of heat on the coffee while still being quiet for use at home (approximately 75db).

Grind on Time or Weight

The grinder has automatic 10 second increments (up to 50 seconds) as well as a manual on off button if you want to grind based on time. For those who grind on weight the removable hopper has been designed with a coffee shut off opening so it can be placed on scales and then put back on to the grinder without any spillage.

Keep Coffee Fresh

The UV protected storage bean hopper holds up to 240 grams of whole bean coffee and can be removed with a simple twist. The included ground coffee container has a capacity of 110 grams and is also UV protected with a silicone stopper for storage.

Use with an Espresso Machine Portafilter

For those who are looking to grind directly into a portafilter an attachment is included and is triggered when the portafilter is put in the cradle, to stop simply remove. The grinder also has a removable disperser allowing coffee to be evenly distributed when using with portafilters of various sizes.

How to Use

1. Add your desired amount of whole bean coffee to the coffee hopper.

2. Place the storage container on the base, directly below the grinder unit and select your desired grind size.

3. "+" or "-" button to select your desired grinding time by referring to Table 1

Grinding Coffee with the Portafilter

1. Attach the portafilter cradle and turn the grind control dial to your desired setting for espresso. Between 0 and 5.

2. Place the portafilter into the cradle and gently push towards the grinder. Simply remove to stop grinding.
