Original Line

Mega Gold M/A

Mega Gold brews straight into an elegant 2.5 litre serving station with tap and level indicator tube. Since no external heat is supplied, the coffee retains its excellent taste and aroma for a long time. The serving station fits into all possible environments, and is quick and easy to handle.

Features

- 2.5 l in < 8 minutes.
- 19 l/h.
- Manual water filling both models.
- Digital display (only available on automatic version).
 - Cup number settings (from 4 to 17 cups).
 - Alarm when coffee is ready.

Serving Station

Our serving station is elegant, timeless and practical. The serving station has a stainless steel inner lining and it has a practical tap and level indication tube. Since no external heat is supplied, the coffee retains its excellent taste and aroma for a long time. The serving station also fits into all possible environments, and is quick and easy to handle.

Features

- Practical tap and level indication tube
- Stainless steel inner lining
- Unique heat retention (thus preserving taste and aroma)
- Integrated handle
- Customizable cover lids (option)

Mega Gold A

Serving Station

ThermoKinetic SERIES

Description

Our new coffee brewers use the kinetic energy generated by the air introduced into the boiler, thus increasing or decreasing the temperature of the water inside the boiler and, in consequence, the water which is poured into the brewing basket. The air supply accuracy, together with a specific PID Control (proportional, integral and derivative) which predicts how the system is reacting, consistently provide the right water temperature in contact with the coffee.

Advanced feature

- ECBC Approved
- Sophisticated combination of temperature control systems, PID included.*
- Efficient water contact timings in the filter gasket.
- Improved TDS rate and a genuine, exceptional taste.
