The flexible

Tank cartridges with an adapter for almost every type of coffee machine

- For coffee machines with an integrated water tank
- Economical, professional and simple
- Safe limescale protection with four levels of filtration
- Large filter capacities for professionals, providing maximum efficiency
- Fast, uncomplicated filter change
- Professional technology for perfect coffee enjoyment and low-cost limescale protection

The uncomplicated

Direct filter that fits JURA* and Saeco* coffee machines

¹ Typical capacity 10 °dKH

* Saeco is a registered brand of Saeco Strategic Services Limited, JURA is a registered brand of JURA Elektroapparate AG. See our website for exact models.

The right solution for all water situations

Providing water in perfect condition at point of use

As Europe's leading Water Technology Company, we do everything possible to optimise raw water with functional and technical solutions that are perfectly designed for every application. From limescale protection for coffee machines that use classic filters, to questions of taste, or the need to remove impurities, you will find the appropriate technology in this Product Locator. BWT water+more will help you become expert at managing any task involving water at point of use.

Optimised water for every need

Our solutions are targeted at different segments of the hotel, restaurant and catering (HORECA) sector. Small bistros or mass-catering locations, classic local and multi-site restaurants, vending machines or the aromatic and exotic world of baking and cooking – all need optimised water.

Worldwide presence with local specialists

BWT water+more, an integral part of the international BWT Group, deploys staff worldwide. Our customers and partners across the world benefit from our international identity, which ensures excellent on-site water technology expertise.

We are renowned for the absolute loyalty we show to our dealers.

ONE FOR ALL
